

STEP-N-WASH

*Parents Will Love This Safe and Easy Way
For Their Children to Access the Sink!*

Step 'n Wash step stools provide a safe boost for children and little people. A concealed spring and damper provide controlled, automatic retraction, keeping the step safely folded out of the way when not in use.

There's no tripping hazard because Step 'n Wash is anchored to the floor beneath the sink or counter. It can't be moved or stolen, and it keeps floor space clear for foot traffic. The marine-grade surface of the step stool provides edge-to-edge non-slip coverage, even when wet.

MAJOR UPGRADES AND DESIGN ENHANCEMENTS

#23234
Stainless Steel

#23234BLK
Matte Black

The upgraded Step-N-Wash has the same anchor pattern and footprint as previous models, so replacing existing units doesn't require any drilling or changes to your restroom design. Rounded corners offer a familiar and approachable feel. Leg covers hide unsightly floor anchors, and prevent anchors from trapping mop fibers and debris. Upgraded spring provides reliable retraction for 100,000+ cycles.
