WIRELESS REMOTE SENSOR FOR PROSYNC™

#613671RS

$78.45 ea

What is PROsync?

The PROsync™ Wireless System is designed to balance temperatures across various rooms. When different parts of your space are conditioned by a single HVAC system, it can cause issues. One room may be just right, another can be too hot or too cold. The PROsync™ system allows you to add wireless remote sensors throughout the building, providing a more accurate temperature reading in individual rooms. Simply wire the module to the air handler, install the thermostat, and position your wireless indoor remote sensors wherever needed. You have the flexibility to configure your system in three unique ways:

- **SYSTEM AVERAGE**
  Average all remotes together to provide a more accurate temperature of the entire building.
- **SCHEDULING**
  Program the system to make different rooms in control for each part of the day.
- **OCCUPANCY SENSING**
  Using the built-in occupancy sensors moves the comfort around with you, setting the temperature to wherever you are.

It supports remote wireless control via Honeywell's ConnectMe mobile app, allowing occupants and facility managers to perform remote monitoring, control, and scheduling.

ELKAY

NEW!

EZ RETROFIT FRAMES

Install a Bottle Filler Without Opening the Wall!

Installing a new bottle filling station doesn't have to mean opening walls, coordinating multiple trades, or dealing with lengthy downtime.

Introducing the new **Elkay® EZ Retrofit Frame**, designed to simplify and accelerate retrofit installations of Elkay Pro Filtration™ bottle filling stations. It is also compatible with most Elkay on-wall bottle filling stations. By eliminating the need for wall modifications, the EZ Retrofit Frame helps reduce installation time, lower labor costs, and minimize disruption—all while delivering a clean, built-in appearance.

Why Choose the EZ Retrofit Frame?

- **Eliminate Wall Demolition – Install over existing rough-ins without costly wall modifications.**
- **Complete Retrofit in 3 Hours or Less – Compared to traditional retrofits that can take 12+ hours.**
- **Reduce Labor & Downtime – One trip, one trade, and less disruption to your facility.**
- **ADA-Ready Design – Helps support accessible bottle filling station installations.**
- **Factory-Located Mounting Points – No on-site measuring required.**
- **Engineered for Strength – Supports up to 300 lbs. and mounts securely to CMU and stud walls.**
- **Cleaner Finished Appearance – Covers existing rough-ins for a seamless, flush installation.**
- **Reduced Asbestos Risk – Avoid wall demolition in older buildings.**

EXTREME SAFETY TAPE - COARSE GRIT

Superior traction helps prevent slips and falls!
Prepare for winter now. Cannot install in cold weather.

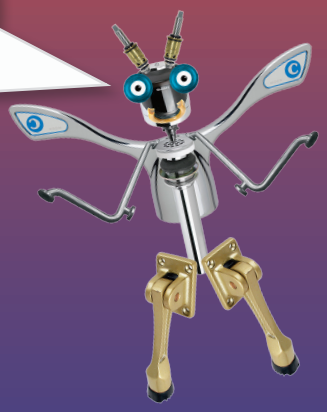

Specially designed for the harshest environments. Works in extreme temps from 220º F to -40º F. Tolerates steam cleaning, detergent cleaning, and low PSI pressure washing. Essentially unaffected by oil, grease, saltwater, mild acid, and alkali exposure under normal conditions. Adhesive bond is three times stronger than other anti-slip tapes. Multi-layer grit embedding process lengthens product life. Easy to cut for custom sizes.
