THE BENEFITS OF WORKING WITH EQUIPARTS:

EXPERTS

Our team receives continuous training about the parts and units we carry. We work closely with our vendors to stay informed about product updates, the latest technology, and industry trends and changes. This ongoing education enables us to provide intelligent answers and technical assistance to our customers. At Equiparts, we are not just "order takers." We are problem solvers.

LARGE INVENTORY

We have thousands of parts and units in stock, including all of the most popular brands, as well as specialty hard-to-find parts.

CUSTOMIZATION

We have strong vendor relationships that enable us to request custom modifications to meet our customers' requirements. The Equiparts team also puts extra effort into sourcing unique, niche items that other companies won't take the time to find.

NETWORK

Equiparts is a member of a large buying group called Total Maintenance Solutions (TMS). This gives us greater buying power with our vendors, enabling us to pass the savings onto our customers.

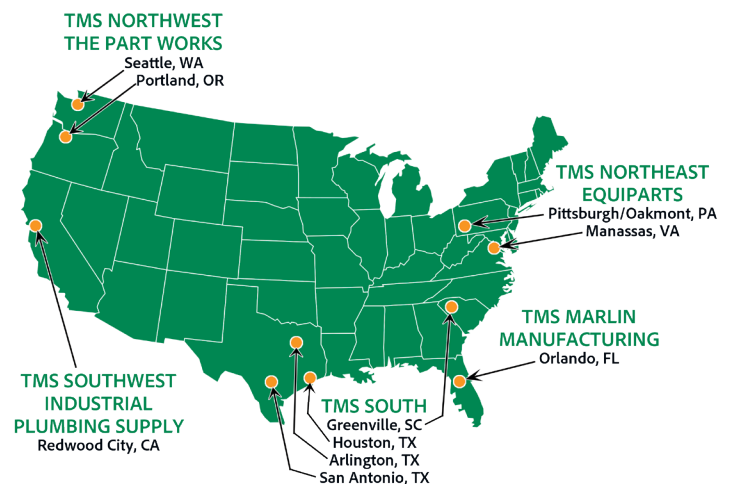

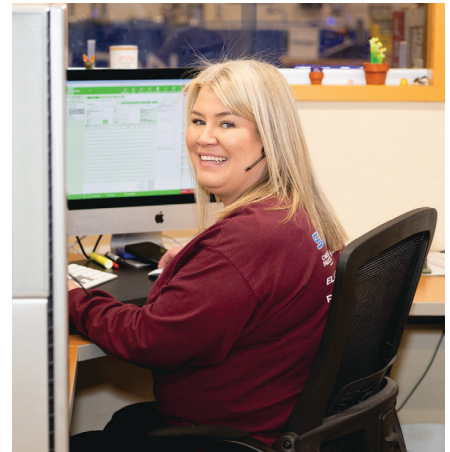

SALES REPS AT EQUIPARTS

Our outside sales team has a presence all over the Northeastern United States. They will work with you on-site to learn about your needs firsthand. In addition, our in-house sales team provides phone support to our customers throughout the US, Canada, and the Caribbean.

Our team is comprised of knowledgeable repair parts specialists, many of whom have worked in the industry for more than 10 years. They know our parts, the industry, and the best way to solve your maintenance repair problems.

EMPLOYEE OWNED

Equiparts became an employee-owned company on August 9, 2024. We have always been committed to outstanding service and technical support. But now that each of us has a personal stake in the company, our dedication to excellence is even more important to our success. We won't prosper unless our customers are happy, so you can trust that we are doing our very best to meet all of your maintenance repair needs.

AN ACTIVE HISTORY:

The success Equiparts has achieved over the past five decades is a testament to the people we employ, and the outstanding manufacturers we represent. Here are some of the highlights we have experienced over the years that have enabled us to stay at the forefront of our industry.

- 1968** Equiparts begins under the name Maintenance Specialties
- 1975** Equiparts splits from Maintenance Specialties to form our own company with six employees
- 1979** Developed our first catalog
- 1982** Expanded by building a second story on 817 Main St. building in Sharpsburg, PA
- 1991** Purchased our first Macintosh computer, and hired our first graphic designer
- 1992** Implemented our first ERP system
- 1999** Launched our first website: Equiparts.net (now Equiparts.com)
- 2000** Hired our first Sales Manager for Outside Sales Reps. Became first Sloan Authorized Repair Center
- 2003** Added second location for our parts counter and inventory space.
- 2007** Published our first comprehensive catalog with full color cover
- 2009** Expanded to accommodate growing Inside Sales team
- 2010** Deployed iPads to the Outside Sales force
- 2014** Implemented a more robust ERP system with more interactive capabilities that improved customer experience
- 2015** Consolidated all operations into one building to create a new headquarters in Oakmont, PA
- 2016** Launched EquipartsDrinkingFountains.com website
- 2017** Equiparts continues to thrive with over 50 employees
- 2019** Printed a new catalog, expanding it by over 50% from the previous volume, and used full color parts photos for the first time
- 2021** Acquired Parts Unlimited Inc. in Manassas, VA.
- 2024** Became a 100% Employee-Owned Company

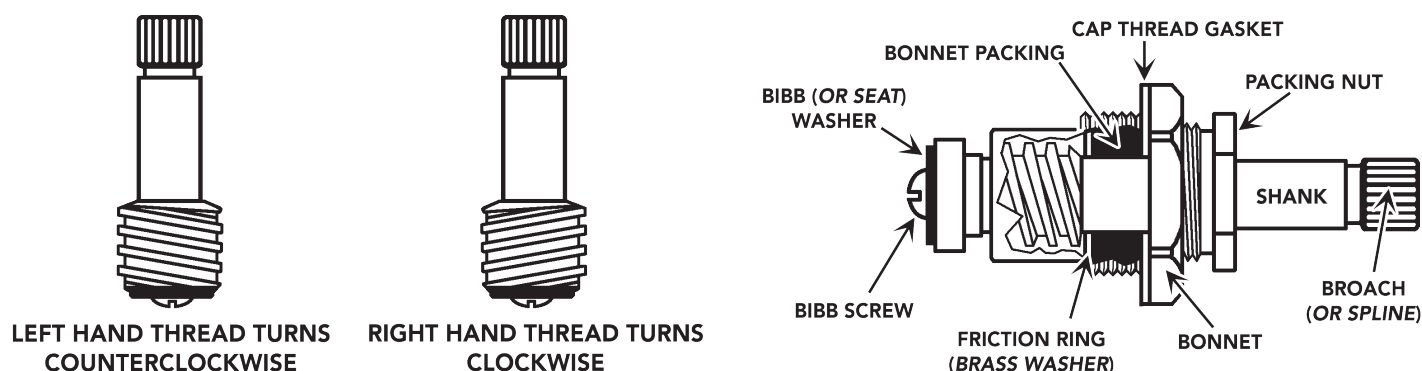

STEM IDENTIFICATION

Left and Right / Hot and Cold

Most often, when you view our selection of stems, they are listed as Left-Handed (LH) or Right-Handed (RH), instead of hot or cold. This is because LH or RH is not synonymous with hot or cold. The handle type and installation of the stems or cartridge(s) changes if it will dispense hot or cold water (or both for single lever faucets).

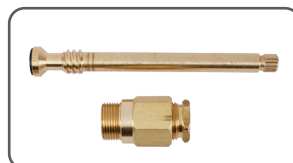

For traditional lever handle faucets, which way the thread rises in the stem determines how it should be installed. The thread on Left-Handed stems rise to the left. They are turned counterclockwise to turn on. The thread on Right-Handed stems rise to the right. They are turned clockwise to turn on.

However, showers will have different applications for cartridges depending on if it's a round or cross handle instead of a lever. This is why left and right don't necessarily equate to being used for hot or cold.

HOW TO SEND US A STEM PHOTO FOR IDENTIFICATION

- Remove part from faucet body.
 - Remove any trim.
 - Take the stem out of the bonnet (*for comp. stems.*)
 - Take a photo of the part next to a ruler.
 - Please make sure the photo is **IN FOCUS**.
 - Use a broach gauge to determine the spline count, and include spline count in your message.
 - Email the photo to: info@equiparts.net.
- Please include your name and phone number.**

Remove stem from bonnet

Use broach gauge

Place stem next to ruler

Show bottom of cartridges

WE DO PARTITIONS!

In addition to providing partition repair parts such as latches, brackets, hinges, hooks, shoes, pintels, strikes and keepers, etc., we also supply complete restroom partitions. Refer to our checklist below to begin your partition order.

Partition Checklist - Ordering Made Easy!

Please submit the following information on a drawing of the layout of the room:

1. Material of new partitions: Stainless steel, solid plastic (HDPE), powder coated, steel, plastic laminate, black core phenolic, or color thru phenolic.
2. Color of new partitions
3. Specify headrail braced, ceiling hung, or floor supported
4. Finished wall dimensions of room
5. C x C dimensions between fixtures (if possible)
6. A.D.A. Requirements
7. Door swings
8. Location of obstructions (radiators, windows, floor drains, etc.)
9. If ceiling hung, must specify floor to ceiling height (f)
